

## Metro LED Tunnel Light 45 degree Bracket

6/1/16

In order to install the Prismsatite 7200 LED fixtures on vertical walls, the 45 degree accessory bracket is designed for that purpose. The lights are the exact same fixtures that were provided to the Red Line tunnel segment from 2012-2015 that were installed on the curved tunnel wall at approximately a 45 degree angle to the emergency catwalk below.
